RESEARCH INTERESTS

Navigating biological complexity through the application of machine learning models augmented by advanced interpretation techniques.

CURRENT ACADEMIC APPOINTMENT

Computational Postdoctoral Fellow, Cold Spring Harbor Laboratory

In March 2022, I joined the [Simons Center for Quantitative Biology](#) at Cold Spring Harbor Laboratory as a Computational Postdoctoral Fellow. The research is formed in collaboration between the [Kinney](#) and [Koo](#) labs, with the goal to bridge the divide between "black-box" deep neural network models in genomics and mechanistically interpretable biophysical models of gene regulation.

Awards

- F32 Individual Postdoctoral Fellowship (2024). Awarded by the National Human Genome Research Institute of the National Institutes of Health. Award Number: F32HG013265.

EDUCATION

Columbia University, New York, NY

Doctor of Philosophy with distinction, May 2017 – January 2022

- Doctoral Thesis: *Analysis of Conformational Continuum and Free-energy Landscapes from Manifold Embedding of Single-particle Cryo-EM Ensembles of Biomolecules*
- Mentor: [Joachim Frank](#), Ph.D.
- Affiliations:
 - [Department of Biological Sciences](#)
 - [Department of Biochemistry and Molecular Biophysics](#)
- Summary: My thesis work focused on the development, interpretation and refinement of a geometric machine-learning approach, called ManifoldEM, using manifold embedding to obtain the energy landscape and corresponding continuum of 3D structures of a molecular machine from an ensemble of cryo-EM images afflicted by low signal-to-noise ratio, random rotations and orientations in 3D space, and distortions introduced by microscopy aberrations. A complete description of my accomplishments is available in my thesis [1].

Master of Philosophy, May 2017 – October 2020

Master of Arts, May 2017 – May 2019

- Cumulative GPA: 3.74
- Core Courses: *Advanced Genetic Analysis; Cell Biology; Eukaryotic Gene Expression; Genomics of Gene Regulation; Protein Thermodynamics; Structural Biology*
- Elective Courses: *Computational Linear Algebra; Cryo-Electron Microscopy; Statistical Mechanics; Topology*

Pre-thesis Rotations:

- [Califano Lab](#), Fall 2017: I conducted research under the guidance of Dr. Andrea Califano, exploring cell regulatory networks using information-theoretic algorithms (ARACNE, FIRE) to identify a set of maximally-informative DNA sequence motifs associated with the FOXM1 master-regulator pathway implicated in tumorigenesis.

- **Gautier Lab**, Summer 2017: I conducted research under guidance of Dr. Jean Gautier, investigating the role of genome instability in cancer using various wet lab experiments—such as plasma purification, spectrophotometry, and electrophoresis—to isolate and analyze specific protein-gene interactions responsible for cellular response to DNA damage.

Awards

- John S. Newberry Prize (2022). Awarded to the graduate student in the Department who, in the opinion of the faculty, is the "most promising student of the year in the field of vertebrate zoology". The awardee was chosen by faculty and staff nominations and consideration by the departmental faculty committee for graduate affairs.

Georgia Institute of Technology, Atlanta, GA

Bachelor of Science in Physics with *Highest Honor*, May 2015 – May 2017

Cumulative GPA: 3.90

- Core Courses: *Classical Mechanics; Differential Equations; Electro and Magnetostatics; Electrodynamics; Linear Algebra for Calculus; Modern Physics; Quantum Mechanics I; Quantum Mechanics II; Statistical Mechanics; Thermodynamics*
- Elective Courses: *Biophysics; Computational Physics; Neurophysics; Nuclei, Particles and Fields; Physics of Living Systems; Probability and Statistics*

Undergraduate Research

- Supervisor: Professor **James Gumbart**, Ph.D.
- Summary: My undergraduate research in Computational Biophysics, supervised by Dr. James Gumbart, focused on simulating the molecular dynamics of the Light Harvesting Complex-II using NAMD and VMD.

Activities and Awards

- *Sigma Pi Sigma* Physics Honor Society
- Faculty Honors

Georgia State University, Atlanta, GA

Initiated my pursuit towards a second degree (in Physics), May 2014 – May 2015. Transferred from Georgia State University (without degree) to the Georgia Institute of Technology

Cumulative GPA: 4.00

- Core Courses: *Calculus of One Variable I; Calculus of One Variable II; Multivariate Calculus; Principles of Chemistry I; Principles of Chemistry II; Principles of Physics I; Principles of Physics II*
- Elective Courses: *Computer Programming in Python*

Activities and Awards

- President's List

Georgia College, Milledgeville, GA

Bachelor of Arts in Mass Communication, May 2005 – May 2009

Activities and Awards

- *Lambda Pi Eta* Honor Society
- National Chair of International Business Club

ADVISING AND MENTORING

Undergraduate Research

• Nika Chuzhoy

Undergraduate student in Computer Science, California Institute of Technology. Computational research on surrogate modeling in functional genomics. 2023

TEACHING
EXPERIENCE

Cold Spring Harbor Laboratory, Cold Spring Harbor, NY

Guest Lecturer

July 19, 2024

- Bioinformatics and Computational Neuroscience Lecture Series

Guest Lecturer

July 21, 2023

- Bioinformatics and Computational Neuroscience Lecture Series

Columbia University, New York, NY

Teaching Assistant

August 2018 – December 2019

- Assistant Instructor for BCHM GU4323: Biophysical Chemistry (Professors: [Dr. John Hunt](#) and [Dr. Art Palmer](#))
 - Fall 2019
 - Responsible for weekly 1-hour recitation lecture, proctoring and grading. This course covered a rigorous introduction to the theory underlying widely used biophysical methods to understand the behavior of molecules and develop related analytical tools, including applications to biomedical research problems.
- Grader for BIOL UN2005 Intro Biology: Biochemistry, Genetics & Molecular Biology
 - Fall 2018
 - Proctored and graded exams.

Georgia Institute of Technology, Atlanta, GA

Creative Director, Animator

May 2016 – February 2017

- Assisted the Department of Physics with the design and animation of educational content for Georgia Tech MOOC (massive online open courses) under advisement of [Dr. Michael Schatz](#). Topics ranged from *Introductory Mechanics* to *Electromagnetism*. Duties included both scientific and artistic, beginning with the translation of physical concepts and theories into a visual language, and ending in the full production of animated video content for semester-long courses. After initial production, served as project lead on a team of animators for creating an extensive library of related videos for the university.
- Lesson 1 – Introduction to Electric Fields: <https://vimeo.com/237845454>

Georgia State University, Atlanta, GA

Physics Learning Assistant

Spring 2015

- Recruited into the Learning Assistant program to aid in the education of students taking *Principles of Physics* under advisement of [Dr. Joshua Von Korff](#). Duties included instruction of two one-hour Physics labs each week, attendance of weekly pedagogy lessons taught by Physics professors, and execution of a weekly theoretical practice lecture with graduate students.

Stanford University, Stanford, CA

Creative Director, Animator

2013, 2015

- Oversaw artistic vision for a series of animations detailing scientific research done by [Dr. Jennifer Aaker](#) and colleagues at Stanford on topics including empathy, humor, and purpose. Responsibilities included storyboarding, creation of animated assets, and unification of artistic vision as it related to the use of visual elements, artistic style, and motion to elicit the relevant emotional responses required to inspire positive change.
- The Happiness Narrative (2015): <https://vimeo.com/210360824>
- Persuasion and the Power of Story (2013): <https://vimeo.com/74576399>

PROFESSIONAL
SERVICE

Referee Service

- *NeurIPS AI4Science Workshop* (2023)
- *NeurIPS Generative AI and Biology Workshop* (2023)
- *Nature* (2023)
- *ICML Workshop on Computational Biology* (2023)
- *Genome Research* (2023)
- *Nature Machine Intelligence* (2023)
- *Journal of Chemical Information and Modeling* (2020)

Scientific Illustrations

- Illustrated journal cover for *JCIM: Special Issue on Frontiers in Cryo-EM Modeling*, Volume 60, Issue 5, May 2020: <https://pubs.acs.org/toc/jcisd8/60/5>

PROFESSIONAL
EXPERIENCE

The following are some of my experiences in the arts, previous to my career change. More information on each of these, and others in between, is provided on my LinkedIn profile

22squared, Atlanta, GA

Editor, Motion Graphics Designer

May 2013 – May 2014

- Designed digital content for major corporate advertising clientele, including Toyota, Baskin-Robbins, PGA Superstore, Buffalo Wild Wings, Costa Rica Tourism Board, and American Standard. (Full-time position).

Indigo Studios, Atlanta, GA

Motion Graphics Designer

May 2011 – August 2012

- Created 2D and 3D computer animations for a variety of clients, including American Cancer Society, Coca-Cola, Georgia Pacific, Southern Company, Infiniti, Cirque du Soleil, Caterpillar, ABF, Ariba, Discovery Channel, and Cartoon Network. (Freelance position)
- Awarded 32nd Annual Telly Award (Bronze) for American Cancer Society animation “Marketing Excellence”

Fuzebox, Inc., Atlanta, GA

Editor, Motion Graphics Designer

January 2010 – June 2012

- Editor and motion graphics artist on “Submit”, a documentary on cyberbullying. Duties included storyboarding, editing, compositing, 2D and 3D animation, and color correction. (Freelance position).

Georgia Public Broadcasting, Atlanta, GA

Editor, Motion Graphics Designer

January 2009 – May 2010

- Supervised post-production activities for daily statewide television broadcasts of “Law-makers”, providing in-depth coverage of state legislature and related issues. Responsibilities included creation of original show open, animation of graphics, and editing of news segments. (Freelance position).

Related Honors and Awards, 2012 – 2015

- 2015 – “The Happiness Narrative” featured at *Future of StoryTelling Summit* in NYC
- 2013 – “The Power of Story” featured at *Future of StoryTelling Summit*, NYC
- 2013 – Vimeo Staff Pick, “ABCinema: Take 2” (>100,000 views)
- 2013 – Vimeo Staff Pick, “Alphagames” (>350,000 views)
- 2012 – “ABCinema” featured at SXSW, PauseFest, Athfest, and Tribeca
- 2012 – Vimeo Staff Pick, “ABCinema” (>500,000 views)

ADDITIONAL
TRAINING

Invited Participant

- [CIFAR Deep Learning + Reinforcement Learning Summer School](#) (July 25–29, 2022)

General Participant

- CSHL Mentor Training Workshop based on the curriculum developed by [CIMER](#) (June 2023)
- SUNY Old Westbury Undergraduate Teaching and Pedagogy Workshop on course design, active learning, and inclusive teaching (Fall 2023)

SOFTWARE
SKILLS

Computer Programming:

- UNIX shell scripting
- Expertise in Python, including libraries: Anaconda, NumPy, Scipy, Pandas, Matplotlib, Mayavi, PyQt, TraitsUI, TensorFlow; among others
- Experience in Matlab, R

Scientific Software:

- UCSF Chimera
- PyMOL
- Visual Molecular Dynamics
- RELION
- Phenix
- Prism
- Mathematica

Visualization Software:

- Adobe Creative Suite: Illustrator, Photoshop, After Effects
- GIMP
- Cinema4D
- Final Cut Pro

Productivity Software:

- \LaTeX (\L\AA TeX , \BibTeX),
- Microsoft Office, Excel, and PowerPoint
- GitHub

Operating Systems:

- Apple OS X
- Linux
- Microsoft Windows family
